Wednesday, Oct. 22, 2008

Time	Duration	Event	Guest	Organizer
07:30 am	1,5 hours	<i>Breakfast</i>		
09:00 pm	1,5 hours	Workshop: <i>The neurophysiology of learning and decision making: examples from animal and human studies.</i>	O'Doherty	Önal, Araragi, Dieler, Andreatta, Nietzer
10:30 am	30 min	<i>Coffee Break</i>		
11:00 am	1,5 hours	Workshop: <i>The neurophysiology of learning and decision making: examples from animal and human studies.</i>	O'Doherty	Önal, Araragi, Dieler, Andreatta, Nietzer
12:30 pm	15 min	Closing words		
12:45 pm		Official end of the meeting		
02:00 pm		Departure		Gerhard, Schick, Günzler, Schulz

Talks:

Marta Andreatta	The rewarding effect of a punishment.
Katharina Diergarten	Recognizing emotion in others primes emotional concepts.
Susanne Gorges	Performance anxiety during a public concert and a public speech.
Ingo Günzler	Metaphors of emotions – an analysis.
Saskia Hahnenkamp	Chronic musculoskeletal pain: Role of emotions in modulating neurobiological correlates.
Robert Kordts	Absence of fear = presence of love? The anticipated negation of aversion elicits approach.
Sarah Nietzer	Morphological investigations of the serotonin-transporter-knockout-mouse-model.
Anne Puschmann	Chronic migraine, stress and emotions – neuroimmunological and psychological correlates.
Johannes Schick	Intuition, melancholia and mania: Method and madness in the philosophy of Henri Bergson.
Sascha Topolinski	How the body shapes preferences.
Tina Dobler	Amygdala - An Introduction

Poster:

Johanna Brütting	How does exposure therapy work? A virtual reality study about the role of attention and distraction in aviophobia.
Alica Dieler	Suppression of emotional words investigated with functional Near-Infrared Spectroscopy (fNIRS).
Michaela Eckert	Two-pore domain potassium channels are targets of clinically used antidepressants.
Heike Ewald & Evelyn Glotzbach	Fear conditioning in the virtual reality.
Matthias Michalik	The more you know, the less you feel – the role (un)certainly plays in affective experience.
Cigdem Önal	No evidence of emotional modulation of consolidation in sequence learning.
Thomas Stemmler	A guilty conscience needs an accuser- Guilt and cooperation: a cognitive dissonance approach.
Romy Weiland	Affective and facial responses to tastes in human adults.
Lena Weißflog	Finding genes for ADHD.
