

Winter semester 2010/2011 – Journal club RTG 1253/1

Date	Speaker	Topic
22 th October 2010	Marta Andreatta Paul Pauli	Introduction and planning
29 th October 2010	Kathrin Gschwendtner Juliane Kopf Marta Andreatta	Cognitive Neuroscience. The biology of the mind
5 th November 2010	Manish Asthana	Use of transcranial direct current stimulation (tDCS) in the extinction of conditioned fear
	Anne Guhn	Effects of high-frequency repetitive transcranial magnetic stimulation (rTMS) on the extinction of conditioned fear
	Martin Hermann	Laboratory for psychophysiology and functional brain imaging
	Jürgen Deckert	Genetic of anxiety and affective disorders
12 th November 2010	Jonas Waider	Neurobiological basis of fear conditioning and extinction
	Sören Merker	The role of autonomous nervous system and hypothalamus in the context of emotions
19 th November 2010	Lingdan Wu	Emotional regulation deficit in nicotine addiction
	Paul Pauli	Addiction
26 th November 2010	Ruben Real	Subjective quality of life – What are we measuring?
	Adrian Meule	Emotion regulation and cardiac autonomic activity
3 rd December 2010	Michael Zürn Sabine Volk Thomas Stemmler	Social psychology and emotion
	Fritz Strack	Reflection and impulse: The dual determination of human behavior
10 th December 2010	Nandini Colaco	Cytokines modulate pain-induced cognitive impairment
	Claudia Sommer	The role of cytokines in pain and emotions
17 th December 2010	Christmas Holiday	
14 th January 2011	Maria Bonn Esther Asan	Morphological investigations on serotonin transporter knockout mice (5-Htt KO)
	Erhard Wischmeyer	Potassium channels – Regulators of fear and depression?
21 th January 2011	Juliane Kopf	Imaging genetics. Results from functional near-infrared spectroscopy studies with probands and bipolar patients
	Andrea Meyer	Epigenetic regulation of NOS1 ex1f VNTR
	Andreas Reif	AG Reif – Research topics, ongoing studies and group composition
28 th January 2011	Margherita Lee	Hippocampal adult neurogenesis in affective disorders
	Angelika Schmitt	Neurobiology of emotional dysregulation – from men to mice (and back?)

4 th February 2011	Tim Gollasch	Aristotle (384 – 322 b.C.), De Anima
	Thomas Bulka	The imagery of emotions. The emotions' metaphorical expression and its foundation in the lived body
	Karl-Heinz Lembeck	
	Karl Mertens	GRK Emotions – Philosophy
